Case Study Assignment Generative AI Prompt Template

Step 1: Identify Course Context

Prompt:

"I teach a course titled _____ (Course Title). The course focuses on (Brief Description of Course Focus)."

Example: *I teach a course titled "Introduction to Environmental Policy" The course focuses on analyzing environmental legislation and its social impact.*

Step 2: List Course Learning Outcomes

Prompt:

"Here are 3-5 learning outcomes for my course:

1. _____
2. _____
3. _____
4. _____

Step 3: Generate a Realistic Scenario

Prompt:

"*Create a realistic case study scenario that allows students to apply the above learning outcomes. The scenario should include background context, key stakeholders, a central issue or challenge, and relevant data or documents."

Optional: "Focus the scenario on specific topic or population."

Step 4: Develop Student Tasks

Prompt:

"Based on the scenario, create a list of tasks students must complete. These should align with the course learning outcomes and include analysis, application, and reflection."

Example:

- Analyze the central issue using course frameworks
- Identify ethical or policy implications
- Propose a solution or intervention
- Reflect on systemic or cultural factors
- Document findings professionally*

Step 5: Write Guiding Questions

Prompt:

"Write 3-5 guiding questions that help students engage with the case study critically and apply course concepts."

Example:

1. What are the key challenges presented in this case?
2. How would you apply (specific theory) to understand the situation?
3. What ethical considerations should be addressed?
4. What intervention or policy would you recommend?
5. How does this case reflect broader systemic issues?"

Step 6: Create a Rubric

Prompt:

"Create a rubric for evaluating student responses to the case study. Include criteria such as:

- Understanding of course concepts
 - Application of theory
 - Critical thinking
 - Ethical reasoning
 - Communication and professionalism"
-
